

## Professor Ye Zhizheng

(1918- )

Ye Zhizheng, famous sedimentologist, marine geologist and geological educationist; academician, the Academia Sinica; born in 1918; graduated from Central University in 1941, Nanjing gained M. S. degree in Missouri University (1948), U. S. A. ; ex-professor, chairman of department of marine geology and dean of studies, Changchun College of Geology; ex-president, Nanjing Institute of Geology and Mineral Resources and Qingdao Institute of Marine Geology, Ministry of Geology & Mineral Resources of China; ex-chairman of the board, Chinese Marine Geological Society; honorary president, Nanjing Institute of Geology and Mineral Resources; director, Research Centre of the Quaternary Geology, Ministry of Geology and Mineral Resources of China; honorary chairman of the board, Chinese Marine Geological Society; vice president, Commission of Sedimentary Geology of Geological Society of China; member, the standing committee of Chinese Oceanology Society; chief editor of Marine Geology & Quaternary Geology and vice chief editor of *Acta Sedimentologica Sinica*; part-time professor of Department of Marine Geology, Tongji University, and part-time professor of Department of Geo and Ocean Science and department of the Earth Sciences, Nanjing University; supervisor of Ph. D. students; senior technical consultant of the Bureau of Guangzhou Marine Survey; standing member CPPCC, Jiangsu Committee; national correspondent the International Association of Sedimentologists; board member, the International Geological Correlation Programme.

Professor Ye Zhizheng dedicates his life to the causes and undertakings of the geological education and research of sedimentary geology and Marine geology and is the founder of Sedimentary geology and marine geology of new China. His principal works and papers include: "Some modern conceptions of marine geology and basic problems about geology" (A scientific collection of Changchun College of Geology, 1962), "Texture classification of carbonate rocks" (Geological Review Vol. 22, No. 5, 1964), "Sedimentation of Sinian algal carbonate rocks" (*Acta Geologica Sinica* Vol. 45, No. 4, 1965), "A preliminary study on the late Pleistocene — Holocene sediments from the Okinawa Trough off Donghai" (Marine Geology & Quaternary Geology Vol. 3, No. 2, 1983), "Sedimentary structure and facies model of late Pleistocene eolian biocalcarenes in isl. Shidao of Xisha Archipelago, China" (*Acta Oceanologica Sinica* Vol. 4, No. 4, 1985), "Contributions to late Quaternary paleoceanography of the South China Sea" (Qingdao Ocean University Press, 1992), "Sedimentary geology and stratabound massive sulphide deposits of late Carboniferous Weining age in the middle and lower Yangtze area" (Geological Publishing House, Beijing China, 1993), etc. .
